

Our experts take the complexity out of technology.

About Trilogy

Trilogy Innovations, Inc., located in Bridgeport, WV, is a minority-owned software and systems engineering company that delivers superior technical solutions for a variety of industries across private and public sectors.

Why Trilogy?

Founded in 2010, Trilogy was formed with one specific goal: to architect and develop the highest quality software and systems by using proven products and engineering practices to efficiently and effectively solve customer problems in the most cost-effective manner.

Application Modernization

Slow, ineffective software system got you down? Trilogy Innovations wants to help bring you into the 21st century by modernizing the platforms and software systems you use to perform your business. We'll do this by rewriting legacy systems to modern computer programming languages, software libraries, protocols, and other hardware platforms.

Cloud Services

Ditch the paper files and save the trees! Cloud software will save you time, money, and improve services you offer. Our cloud services exist to connect your company, your staff, and your data into one convenient location. We do this by building infrastructure and software that grant you better access to better-operating systems directly from the internet (e.g., IaaS, PaaS, SaaS, and FaaS).

Customized Solutions

Data Analytics

Rogue data making a mess of things? Our expert analytic team can make sense of your data and help you implement better strategies toward fulfilling your company's goals. We'll do this by discovering and interpreting meaningful patterns in your software's data and apply them to future decision-making processes. It's time to move on from that old ledger and spreadsheet. Trilogy Innovations is the better way to collect and understand data.

Cybersecurity

Forget to lock the back door? We've got you covered. Our cybersecurity experts ensure your systems and data are protected from intrusions, interruptions, and uninvited guests.

Our Clients

Trilogy's certified and highly skilled personnel successfully provide innovative IT solutions across government agencies and private industry.

Our Partners

Trilogy is partnered with industry leading vendors to architect the highest quality solutions for our clients.
